In Africa

In 2017, our community- friendly team was tipped about a Girl Child educational facility renowned for excellent Academic performance cum equipping learners with firm discipline.

Our team of cross-cutting professionals travelled from Eldoret-Kenya to interface with the top management of ST. THERESA'S NAMAGUNGA P.B.S, in Mukono District, Uganda- Africa on the 14<sup>th</sup> day of November 2017.

The meeting generated meaningful content that was authored and published in our Prestigious Website Platform: [www.safelifeuganda.org](http://www.safelifeuganda.org) on 1<sup>st</sup> December 2017, thus giving the institution Visibility it rightfully deserves.

Since the upload of St. THERESA'S NAMAGUNGA P.B.S development profile on 1<sup>st</sup> December 2017, the popularity of ST. THERESA'S NAMAGUNGA BPS became increasingly high, admirable and truly influential across communities in Uganda, Africa, India and beyond.

We shall serve in bits and in pieces some factors that could have favoured and propelled ST. THERESA'S NAMAGUNGA P.B.S, to excel beyond the imagination of some vibrant Minds and Gifted investors in the Education Sector and beyond.

Well the unique success foot-prints of ST. THERESA'S NAMAGUNGA P.B.S should truly inspire every African institution to Think, Act, and Focus well.

We have briefly identified that ST.THERESA'S most secure strength was keeping glued to the original focus of the institution regardless of stormy challenges over the decades.

The Vision, Mission, and Motto of the institution have not been distorted since 1936.

The focus has proudly recognized that a Girl Child deserves a holistic development and it is the unique strength of ST. THERESA'S NAMAGUNGA P.B.S. In other words it is what makes the institution Unique and Different in many ways.

## THE PURPOSE(S)

With highly-limited flow and presence of resources (financial, material and human resources) it could be an uphill-task for some investors to confidently establish branch facilities designed to disseminate well authored mission statements, goals, core values, and other strategic investment plans.

It is visibly true that some institutions shut down without a single review of the Agenda set to empower establishment of branch facilities and mobile office management facilities.

We have learnt from the success foot- prints of ST. THERESA'S NAMAGUNGA P.B.S that every branch creation and/or establishment would succeed as long as the task is Purpose-Driven on the one part and Demand-Driven on the other.

The stakeholders responsible for the unique success foot -prints of ST. THERESA'S NAMAGUNGA P.B.S, embraced some key items as would be the rightful ingredients of Purpose-Driven Branch creation and establishment.

- Equitable delivery of high quality and affordable educational programs to the Girl Child in Uganda, for Africa and beyond.
- To replicate success stories hard-earned since the establishment of ST. THERESA'S NAMAGUNGA P.B.S in 1936. Empower high quality and affordable educational services through acceptably World-Class facilities in Uganda, for Africa and beyond.
- To holistically appreciate and swiftly respond to popular demand of some stakeholders who strongly admire the unique success record of ST. THERESA'S NAMAGUNGA P.B.S since 1936.

- Prepare to confidently embrace the huge and popular demand for high quality educational services in Uganda, for Africa and beyond.
- The Girl Child plays a centre role and/or key in holistic success of educational programs at every setting of development strategy. It is now Strategic to invest in Girl Child educational programs as women have proven competence in Management Leadership and more.

## **PROJECT DESCRIPTION**

The project has cropped out of the unique success foot-prints of the Parent School herein referred to as: ST. THERESA'S NAMAGUNGA P.B.S. The Parents, together with the School management committee agreed to willingly create additional learning centres to harmonize the huge demand for educational programs and/or services, under the establishment of ST. The Stakeholders then procured a 10 acre Prime land located at Kitende, along Entebbe road, Uganda-Africa.

The construction work is in-progress. By 22<sup>nd</sup> February 2021, the construction work had covered about 15% of the work schedule. It was visible that limited and/or short supply of material resources had somehow slowed the construction work.

The project will steadily develop various components of school facilities not limited to: ADMINISTRATION BLOCK, CLASS ROOM BLOCKS, DORMITORY BLOCKS, DINING/ MAIN HALL COMPLEX, CONVENT BLOCK, STAFF QUARTERS AND GAMES / SPORTS Facilities. The project could cost about UGX 25 billion once fully established.

### **POWER AND ENERGY**

However, water borne toilet facilities shall be powered using underground pumps not connected to the National Supply facility.

The neighborhood is highly peaceful, admirable, and conducive for educational services.
