

H.E.PRESIDENT MUHAMMADU BUHARI (Internet Image)

We proudly salute H.E. Muhammadu Buhari and all relevant stakeholders in the concerted struggle to change the twisted mindset of the Boko Haram communities .We share a moment of prayer with those who have lost loved ones and properly as a result of the said senseless PROJECT -TERROR. Our humble suggestion would appreciate that authorities embrace non-violent approach by promoting peaceful means of conflict resolution. It is visibly true that peace is now more fashionable and desirable than violence. In otherwords ,violence is largely associated with weaknesses than strengths.Actually, violence is highly used by those who fail to engage in intellectual debate and dialogue. LET THE GUNS BE SILENCED AND TALKS GIVEN A PLATFORM. GOD BLESS NIGERIA,GOD BLESS AFRICA.

AN EYE ON NIGERIA

OUCHA suggests NIGERIA should review vital intelligence Resources and some trusted intelligence network to swiftly ascertain line of Strengths, Weaknesses and damaged intelligence fabrics that could have empowered the BOKO HARAM forces to operate in a highly - sophisticated and invisible fashion since 2002.

The World should collectively appreciate the TRUTH that terrorism germinates out of dissatisfaction ,marginalization ,oppression and maybe false calling to serve the evil forces if any .

Well, success of a terror organisation signals broken fabrics of the intelligence resources on the one part and line of weaknesses within some trusted intelligence network on the other .

However ,to guarantee the wellbeing of the intelligence resources and effective survival of intelligence network,the intelligence officials should be well remunerated on the one part and tailored to embrace true love for the Nation State (patriotism) Intelligence officials are mandated custodian of intelligence resources that must be safe guarded 24/7 -365 days a year.Underpayment of intelligence officials could gradually cause leakage and severe damage to intelligence resources .

The so- called terrorists thrive on such weaknesses by infiltrating gaps in the intelligence network and tapping flow of intelligence resources through the cracks usually ignored by some of the state leadership.

Lack of proper management of intelligence resources could empower the so-called terrorists to access intelligence resources at affordable cost and PERIL of innocent Nation State .

- Terrorists are usually very weak human beings driven by acute emotions.They focus on violence to inflict pain and enjoy cost free visibility as they steadily invest in this line of evil activity .
- It is advisable to respond with a peaceful strategy NOT Violence .We must share the understanding that killing one another is a form of human weakness NOT Strength The Government's course of response should be a RECONCILIATORY INITIATIVE with FORGIVENESS AND MERCY very high on the Agenda.These so-called Terrorists should be allowed to come back home,rehabilitated and be enthusiastically re-intergrated within various communities FOR A BETTER AFRICA.

Boko Haram reportedly killed 6,600 innocent people in 2014 .The group reportedly carried out mass abductions including kidnapping of 276 school girls from CHIBOK in April 2014.(en.wikipedia.org)
